User Guide – How to Play Space Cyber Mission

Objective of the Game

Identify and respond to phishing and cybersecurity threats by answering questions across 5 progressively challenging levels.

1. Launching the Game

- Run main.py to start the game.

- The game opens in **fullscreen mode**.

2. Logging In

- On the main screen, click **"User Login."**

- If you're a new player, click **"Register New User"** and create your username and password.

- Existing users can log in with their credentials.

3. Home Screen

- After login, you'll see a **welcome screen** with a short mission brief.

- Click **"Start Game"** to proceed to the **Level Select** screen.

4. Level Selection

- Begin with **Level 1**.

- Higher levels unlock automatically as you complete previous ones.

- Your current score is shown on the top.

5. Gameplay Instructions

- Each level contains **2 randomly selected multiple-choice questions (MCQs)**.

- Select one of the given options and click **"Submit."**

- You earn **+10 points** for a correct answer and lose **-5 points** for a wrong one.

- **Three wrong answers** or a **score below 0** will force you to retry the level.

6. Feedback System

- A **correct answer** triggers a sound and updates your score.

- A **wrong answer** plays a different sound and deducts points.

- Score is displayed throughout gameplay.

7. Game Completion

- After finishing **all 5 levels**, you will see a **congratulations screen** with your final score.

- You can choose to **replay the game** or **exit**.

8. Replay / Logout Options

- From any screen, click **"Logout"** to return to the login page.

- You may reset progress from the **Level Select** screen after game completion.
